

JOIN OUR POOL OF EXPERTS

CESA's extended pool of experts is responsible for conducting technical assessment of Etimad Accreditation applications.

The technical committee is **the heart of the Etimad Accreditation process**. Its members are responsible for the technical evaluation of projects submitted by ESPs applying for Etimad Accreditation. They are also responsible to assess different aspects of a company's operation including the qualifications of its employees, its organizational structure, track record, and customer satisfaction rates. After evaluation of an ESP's application, the committee provides its recommendation to CESA board of directors for the final accreditation decision.

Our pool of experts believes that high quality service can only come from top quality firms. They work on a **voluntary basis** to enhance Jordan's energy sector and **make a difference** in the market. Through their work with CESA, they **enjoy access to information** that enhances their technical background and provides them with a more complete picture of the energy industry in Jordan. Extending Etimad's pool of experts will **enrich the evaluation process and ensure its transparency and credibility**.

Our experts must meet the following criteria:

- At least 10 years of experience in one or more of Etimad's accreditation technologies PV, SWH, HVAC, Building Envelope, Lighting
- Participated in the design, development and implementation of energy-related projects

If you meet the above-mentioned criteria and are interested in joining our technical pool of experts, please contact

Eng. Nermeen Asfour, CESA Business Development Manager,
