Subject: Addendum -1/ Accreditation Information Package Ver 2.2017

Dear All;

This addendum should be read with the accreditation information package Ver2.2017 and is considered a part of its guidelines and conditions.

The following statement is to be added to the definition of the ESCO category on Page 3 of “CESA Accreditation Application Guidelines version 2.2017”:

“To gain ESCO accreditation, applicants must clearly demonstrate technical capability and project experience in at least two of the sub-categories for accreditation outlined in Table – 2/Pg.3 for each project. In addition, the applicant must demonstrate experience with multiple technologies and the ability to implement comprehensive projects.”

The evaluation of the second round applications shall take this addendum into consideration and will have a clear assessment for this particular point in the final technical report.

Many Thanks
